

Investment objective (summary of investment policy)

The PSG Multi-Management Global Flexible Fund of Funds' investment objective is long-term capital appreciation through active asset allocation management of a diversified portfolio of collective investment schemes established, recognised and regulated in any approved country and assets in liquid form. The emphasis will be on equities but subject to the Prospectus there will be no limit on the asset classes in which the fund may invest and if circumstances warrant it, the Fund may be invested predominantly or entirely in bond funds or cash. The fund may, where market conditions are adverse from time to time hold up to 100% cash. The fund will be invested in at least five underlying collective investment schemes and no more than 20% of the fund's gross assets will be invested in any one underlying collective investment scheme. The portfolio may invest in Collective Investment Schemes that use derivative instruments for efficient portfolio management.

Who should consider investing?

Specific fund risks: The fund sits within the top end of the risk/reward spectrum and investors should be comfortable with fluctuations in shares on global stock markets. The risk of short-term monetary loss is high due to volatility of exchange rates and global markets. The portfolio is exposed to equity as well as default and interest rate risks. Interest rate risk is the risk that the value of fixed income investments tends to decrease when interest rates and/or inflation rises. Default risk is where the issuers of fixed income instruments may not be able to meet interest or capital repayments. Investing in foreign securities may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations. Where derivatives are included it may increase overall risk by magnifying the effect of both gains and losses and may lead to large financial losses. Changes in the relative values of different currencies may adversely affect the value of investments.

This fund is suitable for investors who:

- seek long-term wealth creation
- are comfortable with market and exchange rate fluctuations
- have an investment horizon of at least five years

Annualized return % (after fees)

As of date: 31/12/2024

Rolling returns (%)

The rolling return chart reflects the highest, lowest and average annualised return over the period indicated since the inception of the fund. For example, for the 1 year period the chart reflects the highest, lowest and average 12 month return the fund has experienced since its inception. Rolling returns highlight the magnitude of an investment's stronger and poorer periods of performance.

What is a Total Expense Ratio (TER)?

The Total Expense Ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over a one and three year period. This percentage of the average Net Asset Value (NAV) of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER ratio does not necessarily imply a poor return, nor does a low TER ratio imply a good return. The current TER cannot be regarded as an indication of future TERs. Part of the Annual Management Fee may be payable to the financial intermediary. The sum of the TER and transaction costs is shown as the Total Investment Charge. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns.

Transaction costs

Transaction costs are shown separately and are a necessary cost in administering the Financial Product and impacts Financial Product returns.

Transaction costs should not be considered in isolation as return may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

Fees

A schedule of fees and charges and maximum commissions is available on request from PSG Collective Investments (RF) Limited. Commission and incentives may be paid and, if so, are included in the overall costs. Different classes of participatory interest can apply to these portfolios and are subject to different fees, charges and possibly dividend withholding tax and will thus have differing performances. Adviser fees are negotiated between the client and adviser and is distinct from the other fees on this document.

Disclaimer

General information and risks

Please note that there is no guarantee that the investment objective of the fund will be achieved, and investment results may vary substantially over time.

Collective Investment Schemes (CIS) in securities are generally medium- to long-term investments. The value of participatory interests (units) or the investment may go down as well as up and past performance is not a guide to future performance.

Fluctuations or movements in the exchange rates may cause the value of underlying international investments to go up or down. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Where foreign securities are included in a portfolio, the portfolio is exposed to risks such as potential constraints on liquidity and the repatriation of funds, macroeconomic, political, foreign exchange, tax, settlement and potential limitations on the availability of market information. The portfolios may be capped at any time in order for them to be managed in accordance with their mandate. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures and in such circumstances a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. The portfolio may borrow up to 10% of the market value to bridge insufficient liquidity.

Past performance is not a reliable indicator of future results and you may get back less than you originally invested. This publication is for private circulation and information purposes only and does not constitute a personal recommendation or investment advice or an offer to buy/sell or an invitation to buy/sell securities in the fund. The information and any opinions have been obtained from or are based on sources believed to be reliable, but accuracy cannot be guaranteed. Due to rounding, numbers presented throughout this document may not add up precisely to the totals provided. In some countries the distribution of this publication may be restricted. It is your responsibility to find out what those restrictions are and observe them. Please always refer to the fund's prospectus.

The portfolio's risk and reward category may not capture all material risks to which the portfolio may be subject, such as:

Geopolitical Risk - investments in equities issued or listed in different countries may imply the application of different standards and regulations, exposure to changes in laws or restrictions applicable to such investments, changes in exchange control regulations or price volatility.

Liquidity Risk - in extreme market conditions some equities may become hard to value or sell at a desired price.

Exchange Rate Risk - the portfolio may invest in equities denominated in currencies other than US Dollars, this expose the portfolio to fluctuations in exchange rates. Further information on risks may be found in the "Risk Factors" section in the Prospectus.

Legal Notice

PSG Multi-Management Global Flexible Fund of Funds (Dollar) is a fund of the PSG Global Portfolio, an open-ended collective investment scheme organised as an umbrella unit trust under the laws of Malta and licensed by the Malta Financial Services

Authority in terms of the Investment Services Act (Chapter 370, Laws of Malta).

Performance

All performance data for a lump sum, net of fees, includes income and assumes reinvestment of income on a NAV to NAV basis. Annualised performances show longer term performance rescaled over a 12-month period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Performance is calculated for the portfolio and individual investor performance may differ as a result thereof. The Portfolio is valued at 23:59 (CET) on each dealing day. Actual annual figures are available to the investor on request. Figures and benchmark quoted are from Morningstar Inc. Prices are published daily and available on the website www.psgglobal.com. PSG Fund Management (Malta) Ltd does not provide any guarantee with the respect of the capital or the return of the portfolio.

Pricing

Forward pricing is used. Unit trust prices are calculated on a net asset value (NAV) basis, which is the market value of all assets in the portfolio including income accruals less permissible deductions divided by the number of units in issue.

Fund of Funds

A Fund of Funds portfolio only invests in portfolios of other collective investment schemes, which levy their own charges, which could result in a higher fee structure for Fund of Funds portfolios.

Fees

A schedule of fees and charges and maximum commissions is available on request from the manager. Commission and incentives may be paid and, if so, are included in the overall costs. Different classes of Participatory Interest can apply to these portfolios and are subject to different fees, charges and possibly dividend withholding tax and will thus have differing performances.
