

Investment objective (summary of investment policy)

The PSG Investment Management Opportunity Equity Fund of Funds objective is to achieve long-term capital growth. The focus will be on equity markets via listed and unlisted participatory interests in Collective Investment Schemes which allows the inclusion of listed and unlisted financial instruments (derivatives). The portfolio intends on capturing opportunities in equity markets by allocating capital to local and offshore equity opportunities via a set of skilled asset managers that focus on opportunities in equity markets, consisting of a blend of strategies like value, growth, active and passive, or individual managers who may blend components of each of these styles.

Who should consider investing?

Specific Fund Risks: The fund sits at the top end of the risk/reward spectrum and investors should be comfortable with fluctuations in shares on stock markets. The portfolio is concentrated in local and foreign equities and therefore may be more volatile and exposed to market and currency risk. Property shares may be included in the portfolio which can carry the same risk as investing directly in real estate and is subject to economic and political conditions, interest rates and tax considerations. Investing in foreign securities may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations. Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

This fund is suitable for investors who:

- want an equity-focused portfolio that should produce high real return above inflation and capital appreciation over the long term
- are comfortable with significant stock market fluctuations
- are willing to accept potential capital loss
- have a long-term investment horizon of five years and longer

What is a Total Expense Ratio (TER)?

The Total Expense Ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over a one and three year period. This percentage of the average Net Asset Value (NAV) of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER ratio does not necessarily imply a poor return, nor does a low TER ratio imply a good return. The current TER cannot be regarded as an indication of future TERs. Part of the Annual Management Fee may be payable to the financial intermediary. The sum of the TER and transaction costs is shown as the Total Investment Charge. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns.

Transaction costs

Transaction costs are shown separately and are a necessary cost in administering the Financial Product and impacts Financial Product returns.

Transaction costs should not be considered in isolation as return may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

Fees

A schedule of fees and charges and maximum commissions is available on request from PSG Collective Investments (RF) Limited. Commission and incentives may be paid and, if so, are included in the overall costs. Different classes of participatory interest can apply to these portfolios and are subject to different fees, charges and possibly dividend withholding tax and will thus have differing performances. Adviser fees are negotiated between the client and adviser and is distinct from the other fees on this document.

Disclaimer

Collective Investment Schemes (CIS) in securities are generally medium to long term investments. The value of participatory interests (units) or the investment may go down as well as up and past performance is not a guide to future performance. Fluctuations or movements in the exchange rates may cause the value of underlying international investments to go up or down. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The portfolio may borrow up to 10% of its market value to bridge insufficient liquidity. Where foreign securities are included in a portfolio, the portfolio is exposed to risks such as potential constraints on liquidity and the repatriation of funds, macroeconomic, political, foreign exchange, tax, settlement and potential limitations on the availability of market information. The portfolios may be capped at any time in order for them to be managed in accordance with their mandate. PSG Collective Investments (RF) Limited does not provide any guarantee either with respect to the capital or the return of the portfolio. Due to rounding, numbers presented throughout this document may not add up precisely to the totals provided.

Fund of Funds

A Fund of Funds portfolio invests in portfolios of other collective investment schemes, which levy their own charges, which could result in a higher fee structure for Fund of Funds portfolios.

Performance

All performance data for a lump sum, net of fees, includes income and assumes reinvestment of income on a NAV to NAV basis. Annualised performances show longer term performance rescaled over a 12-month period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Performance is calculated for the portfolio and individual investor performance may differ as a result thereof. The portfolio is valued at 15h00 daily. The cut-off time is determined by the investment platform. Income distributions are net of any applicable taxes. Actual annual figures are available to the investor on request. Prices are published daily and available on the website <https://www.psg.co.za/psg-multi-managed-funds> and in the daily newspapers. Figures quoted are from Morningstar Inc.

Pricing

Forward pricing is used. Unit trust prices are calculated on a net asset value (NAV) basis, which is the market value of all assets in the portfolio including income accruals less permissible deductions divided by the number of units in issue.

Redemptions

The ability of a portfolio to repurchase is dependent upon the liquidity of the securities and cash of the portfolio. To protect investors, a manager may suspend repurchases for a period, subject to regulatory approval, to await liquidity. A suspension ensures that the sale of a large number of units will not force PSG Collective Investments (RF) Limited to sell the underlying investments at a price in the market which could have a negative impact on investors. PSG Collective Investments (RF) Limited will keep all investors

informed should a situation arise where such suspension is required.

Fees

A schedule of fees and charges and maximum commissions is available on request from PSG Collective Investments (RF) Limited. Commission and incentives may be paid and, if so, are included in the overall costs. Different classes of Participatory Interest can apply to these portfolios and are subject to different fees, charges and possibly dividend withholding tax and will thus have differing performances.
